Designed with Superior Flexibility for Hand Sanding and Finishing.

EZ Touch contour sanding medium, fine and super fine sponges are coated on one side with high performance aluminum oxide and ultra fine and micro fine EZ Touch sponges are made with silicon carbide abrasives. They can be used on a variety of materials – wood, metal, fiberglass, composites, and plastic as well as on primed, stained, sealed or painted surfaces. They are washable and can be used wet or dry.

EZ Touch contour sponges are designed to give needed flexibility for hand sanding and finishing. Their conformability allows you to generate a superior finish in hard to reach areas and corners on wood and metal furniture and detailed cabinets, composites and solid surfaces.
