

# smartlockpro® Extra-Heavy Duty Self-Test GFCI Receptacles

Industrial & Hospital Grade

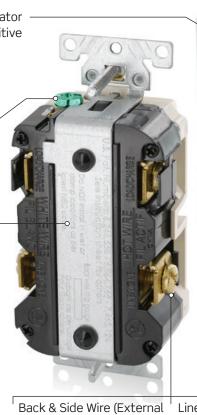

### Extra-Heavy Duty Industrial & Hospital Grade Self-Test GFCI Receptacles

Smooth (not textured) PBT face cover facilitates cleaning and provides significant impact resistance and protection from harsh chemicals

Dual function status indicator light provides simple, intuitive feedback on power and protection status as well as correct wiring

Wiring clamp provides for back or side wiring of ground terminal

Wraparound steel \_\_\_\_\_ strap provides superior structural integrity, especially in hard-use environments

Back & Side Wire (External Back Wire Clamps) Line terminal clamps initially held open to expedite first time wiring Brass self-grounding clip is permanently staked on for secure and reliable performance

Removable safety covers on feed through terminals provide added safety

Leviton Patented Reset Lockout

Tamper-resistant shutters (where stated)

Slim profile provides 25% more room in the wall box

Improved strap design provides greater support, even with ears removed

### Additional Features & Benefits

- Patented bridge contact design provides individual sets of contacts for GFCI receptacle face and downstream receptacles; no power will be delivered to receptacle face if improperly wired (line-load reversed)
- Improved immunity to high frequency noise reduces nuisance tripping
- Advanced electronics provides superior resistance to electrical surges and over-voltages
- Low-profile design is easy to install in all electrical boxes
- Patented SmartlockPro<sup>®</sup> protection prevents resetting when ground fault protection has been lost

### New Revision to UL Standard 943 for GFCIs

Underwriters Laboratories (UL) standards now require newly manufactured GFCIs to be auto-monitoring (self-testing) by conducting an internal test to confirm that protected power is available.

Our complete line of Class A self-test GFCIs periodically conduct an automatic internal test to confirm that protected power is available. If the GFCI detects a problem, one or more of the following will occur:

- Power will be denied (trip with the inability to reset)
- Trip with the ability to reset, subject to the next auto-monitoring test cycle or repeatedly trip
- Visual indication

### Status Indicator Light

Leviton GFCI devices feature an LED Status Indicator Light which provides a visual indication to the user of the status of GFCI protection. This is a convenient way to check the level of protection at-a-glance.

### **GREEN LED - NORMAL OPERATION**

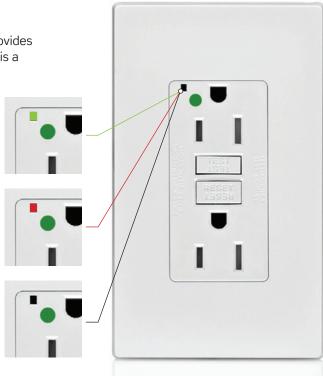

• GFCI has passed self-test and is providing power

### **RED LED - ALERT!**

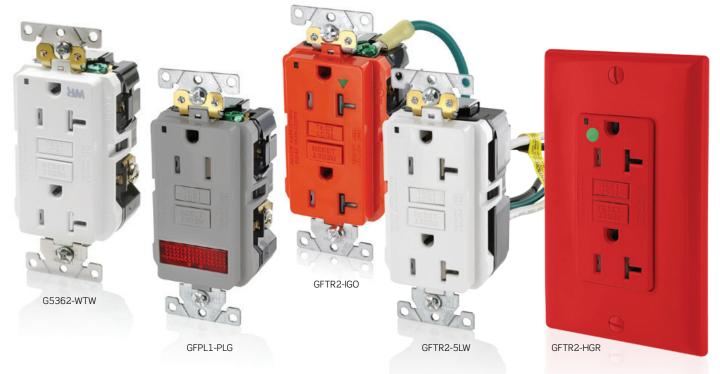

- Blinking Initial self-test upon first power up
- Solid or blinking Press TEST and RESET buttons to reset GFCI
- If GFCI will not reset OR solid or blinking red continues, replace device

### **NO LED - NO POWER**

- GFCI in tripped state
- Press RESET button
- If GFCI will not reset, no power on the circuit

### **Extra-Heavy Duty Self-Test GFCI Receptacles**

\*Wallplates not included with WR & TR configurations

### **Additional Features & Benefits**

### Weather-Resistant:

- Designed for wet and damp locations to meet the requirements of NEC<sup>®</sup> Section 406.8
- Nickel Plated steel strap and stainless steel screws
- Conformal coated PC board to protect critical components from moisture
- Cold impact resistance
- UV stabilized plastics

#### NAFTA Compliant:

Suitable for installation where compliance with the Buy American Act is desirable

#### Isolated Ground:

- Isolated ground receptacles isolate the strap/ground lead to reduce electrical noise interference to sensitive electronic equipment
- Isolated ground terminal pre-wired with #12 AWG stranded wire for quick assembly

#### Leaded:

- Includes #12 AWG TEW line & load leads plus a ground wire to significantly reduce installation times
- Leads are 6" long with wire nuts on load leads

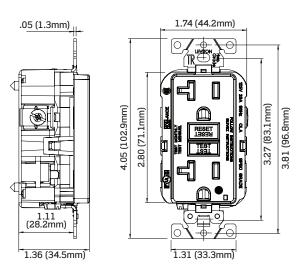

#### Pilot Light:

- Ideal for equipment protection on dedicated branch circuits
- High-visibility LED provides a visual indication of power status - ideal for applications where receptacles are not easily accessible

### **Additional Features & Benefits**

- Sensor provides automatic ON/OFF illumination based on ambient lighting
- Dual lens provides visible light with a variety of plugs or transformers
- Custom designed lenses with edge-mounted LEDs improve light dispersion
- Saves space by eliminating the need to use an outlet or a plug-in night light
- Power indication LED, white to match guidelight LED's
- Wallplate not included

### **Additional Features & Benefits**

- Only Modular GFCI currently available on the market with feed-through terminals for downstream protection
- All modules have a Circuit ID Label for ease of identification
- Solid brass locking pins for strong, secure connection between receptacle & wiring module
- Use with Leviton Cat. MSTWL series wiring modules available with stranded or solid leads as well as push wire connectors
- Wallplate and wiring module not included
