

# **SAFETY DATA SHEET**

| Section 1. Identification                                  |  |  |
|--|--|--|
| GHS product identifier                                     | : TAPCUT   |  |
| Product code   | : 53-A 103 (350 mL), 53-A 106 (5 L), 53-A 107 (20 L)   |  |
| SDS no.  | : L-115E   |  |
| Product type   | : Liquid.  |  |
| Identified uses  |  |  |
| Thread cutting lubricant.                                  |  |  |
| Manufacturer   | : Walter Surface Technologies Inc.<br>Bio-Circle - A Division of Walter Surface Technologies Inc.<br>810 Day Hill Road<br>Windsor, CT 06095<br>United States<br>General Information: 18665925837<br>info.us@walter.com<br>www.walter.com |  |
| Emergency telephone<br>number (with hours of<br>operation) | : INFOTRAC <sup>®</sup> 1-800-535-5053, Outside U.S.A. call collect: 1-352-323-3500 24 hours/day, 7 days/week.   |  |

### Section 2. Hazards identification

| OSHA/HCS status                            | : While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this SDS contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and available for employees and other users of this product. |
|--|--|
| Classification of the substance or mixture | : Not classified.  |
|  |  |
| GHS label elements                         |  |
| Signal word                                | : No signal word.  |
| Hazard statements                          | : No known significant effects or critical hazards.  |
| Precautionary statements                   |  |
| Prevention                                 | : Not applicable.  |
| Response                                   | : Not applicable.  |
| Storage                                    | : Not applicable.  |
| Disposal                                   | : Not applicable.  |
| Hazards not otherwise<br>classified        | : None known.  |

### Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

**Product code** 

: 53-A 103 (350 mL), 53-A 106 (5 L), 53-A 107 (20 L)

#### **CAS number/other identifiers**

**CAS number** 

: Not applicable.

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section. Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### Description of necessary first aid measures

| Eye contact  | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Get medical attention if irritation occurs.</li> </ul>   |
|--------------|--|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately.  |
| Skin contact | : Flush contaminated skin with plenty of water. Get medical attention if symptoms occur.   |
| Ingestion    | : Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. |

| Most important symptoms/effects, acute and delayed |   |  |  |
|--|---|--|--|
| Potential acute health effe                        | Potential acute health effects  |  |  |
| Eye contact  | : No known significant effects or critical hazards.   |  |  |
| Inhalation   | : No known significant effects or critical hazards.   |  |  |
| Skin contact                                       | : No known significant effects or critical hazards.   |  |  |
| Ingestion  | : No known significant effects or critical hazards.   |  |  |
| <u>Over-exposure signs/sym</u>                     | <u>ptoms</u>  |  |  |
| Eye contact  | : No known significant effects or critical hazards.   |  |  |
| Inhalation   | : No known significant effects or critical hazards.   |  |  |
| Skin contact                                       | : No known significant effects or critical hazards.   |  |  |
| Ingestion  | : No known significant effects or critical hazards.   |  |  |
|  |   |  |  |
| Indication of immediate me                         | dical attention and special treatment needed, if necessary  |  |  |
| Notes to physician                                 | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |  |  |
| Specific treatments                                | : No specific treatment.  |  |  |
| Protection of first-aiders                         | : No action shall be taken involving any personal risk or without suitable training.  |  |  |

### Section 4. First aid measures

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : In case of fire, use foam, dry chemical or carbon dioxide.  |
| Unsuitable extinguishing media                 | : None known.   |
| Specific hazards arising from the chemical     | : No specific fire or explosion hazard.   |
| Hazardous thermal decomposition products       | : No specific data.   |
| Special protective actions for fire-fighters   | : No special measures are required.   |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

## Section 6. Accidental release measures

### and a state of the second

| Personal precautions, protec   | tive equipment and emergency procedures  |
|--------------------------------|--|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.  |
| For emergency responders       | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| Methods and materials for co   | ntainment and cleaning up  |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

### Section 7. Handling and storage

| Precautions for safe handling                                      |  |  |
|--|--|--|
| Protective measures  | Put on appropriate personal protective equipment (see Section 8).  |  |
| Advice on general occupational hygiene                             | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. See also Section 8 for additional information on hygiene measures.  |  |
| Conditions for safe storage,<br>including any<br>incompatibilities | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible material (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kep upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. |  |

### Section 8. Exposure controls/personal protection

#### **Control parameters**

Occupational exposure limits

| I | 101 | ie. |  |
|---|-----|-----|--|
|   |     |     |  |
|   |     |     |  |

| Appropriate engineering<br>controls | : | Ensure adequate ventilation. No personal respiratory protective equipment normally required.  |
|-------------------------------------|---|---|
| Environmental exposure<br>controls  | : | Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. |

| Individual protection measures | <u>s</u> |   |
|--------------------------------|----------|---|
| Hygiene measures :             |          | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. |
| Eye/face protection :          |          | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists,   |

|                       | gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.  |
|-----------------------|--|
| Skin protection       |  |
| Hand protection       | : Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated.<br>Recommended: Nitrile gloves 0.4 mm thick, permeation time 480 minutes. |
| Body protection       | <ul> <li>Personal protective equipment for the body should be selected based on the task being<br/>performed and the risks involved and should be approved by a specialist before<br/>handling this product.</li> </ul>  |
| Other skin protection | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |

#### A division of Walter Surface Technologies

### Section 8. Exposure controls/personal protection

**Respiratory protection** 

: Use a NIOSH/MSHA approved respirator if there is a risk of exposure at levels exceeding the exposure limits. Advice should be sought from respiratory protection specialists.

### Section 9. Physical and chemical properties

| <u>Appearance</u>                            |                                    |
|--|------------------------------------|
| Physical state                               | : Liquid.                          |
| Color  | : Light yellow.                    |
| Odor   | : Characteristic.                  |
| Odor threshold                               | : Not available.                   |
| рН   | : Not available.                   |
| Melting point                                | : Not available. Pour point: -24°C |
| Boiling point                                | : Not available.                   |
| Flash point                                  | : Closed cup: >250°C (>482°F)      |
| Evaporation rate                             | : Not available.                   |
| Flammability (solid, gas)                    | : Not available.                   |
| Lower and upper explosive (flammable) limits | : Not available.                   |
| Vapor pressure                               | : Not available.                   |
| Vapor density                                | Not available.                     |
| Density                                      | : 0.933 g/ml @ 20°C (68°F)         |
| Solubility                                   | : Completely miscible in water.    |
| Partition coefficient: n-<br>octanol/water   | : Not available.                   |
| Auto-ignition temperature                    | : Not available.                   |
| Decomposition temperature                    | : Not available.                   |
| Viscosity                                    | : Not available.                   |
| VOC content                                  | : 0 % (w/w)                        |

### Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : No specific data.  |
| Incompatible materials             | : Reactive or incompatible with the following materials: oxidizing materials.                          |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

### Section 11. Toxicological information Information on toxicological effects Acute toxicity

There is no data available.

Irritation/Corrosion There is no data available.

### **Sensitization**

There is no data available.

#### **Carcinogenicity**

There is no data available.

#### Specific target organ toxicity (single exposure)

There is no data available.

#### Specific target organ toxicity (repeated exposure)

There is no data available.

#### Aspiration hazard

There is no data available.

| Information on the likely | . Dermal contact Insection |
|---------------------------|----------------------------|
| Information on the likely | Dermal contact. Ingestion. |

#### routes of exposure

| Potential acute health effects |   |   |
|--------------------------------|---|---|
| Eye contact                    | : | No known significant effects or critical hazards. |
| Inhalation                     | : | No known significant effects or critical hazards. |
| Skin contact                   | : | No known significant effects or critical hazards. |
| Ingestion                      | : | No known significant effects or critical hazards. |

#### Symptoms related to the physical, chemical and toxicological characteristics Eve contact No known significant effects or critical hazards

| Eye contact  | . No known significant enects of childa hazards.    |
|--------------|---|
| Inhalation   | : No known significant effects or critical hazards. |
| Skin contact | : No known significant effects or critical hazards. |
| Ingestion    | : No known significant effects or critical hazards. |
|              |   |

#### Delayed and immediate effects and also chronic effects from short and long term exposure

| <u>Short term exposure</u>       |   |  |  |
|----------------------------------|---|--|--|
| Potential immediate effects      | : No known significant effects or critical hazards. |  |  |
| Potential delayed effects        | : No known significant effects or critical hazards. |  |  |
| Long term exposure               |   |  |  |
| Potential immediate effects      | : No known significant effects or critical hazards. |  |  |
| Potential delayed effects        | : No known significant effects or critical hazards. |  |  |
| Potential chronic health effects |   |  |  |
| General                          | : No known significant effects or critical hazards. |  |  |
| Carcinogenicity                  | : No known significant effects or critical hazards. |  |  |
| Mutagenicity                     | : No known significant effects or critical hazards. |  |  |

### Section 11. Toxicological information

- : No known significant effects or critical hazards.
- **Developmental effects**
- : No known significant effects or critical hazards.
- **Fertility effects**

**Teratogenicity** 

: No known significant effects or critical hazards.

#### Numerical measures of toxicity

Acute toxicity estimates

There is no data available.

### Section 12. Ecological information

#### Toxicity

There is no data available.

#### Persistence and degradability

There is no data available.

#### **Bioaccumulative potential**

| There is no data available.                            |                  |
|--|------------------|
| <u>Mobility in soil</u>                                |                  |
| Soil/water partition<br>coefficient (K <sub>oc</sub> ) | : Not available. |

Other adverse effects : No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information

|                               | DOT Classification | IMDG           | ΙΑΤΑ           |
